<b>C</b>	Black screw cover	2	2
<b>N</b>	Nut	2	2
<b>WI</b>	Plastic Wheel Insert	4	4
<b>S</b>	Screw (2in.)	20	24

1. Attach the short cross members **SC** between the ends of the end frames **E**, using 2 in. screws. Making sure all the holes are facing the same direction. Push the four plastic wheel inserts **WI** into the bottoms of the end frames **E**.
2. Insert a screw **S** through the hole in the top of the end frame **E** and hang a slide rod **R** over the screw. Thread the screw into the top bracket **TB**. The holes on the top bracket should be facing up. Repeat this step on other end frame. **See detail #1.**
3. Insert a screw **S** through the hole in the short cross member **SC**, and between the slide rod **R**. Slide on a domed washer **DW**, thread and tighten on a nut, **N** place a black screw cover **C** on the end of the screw. **See detail #2.** Repeat this step on other side.
4. Insert a screw **S** through any hole in the end frame **E** and thread into a long cross member **LC**. Attach the other end frame to the opposite end of the long cross member. Repeat this step for all remaining long cross members.
5. Snap the stem of the wheels **W** into the plastic wheel inserts. Place the plant trays **P** on the shelves.
6. Enjoy your new plant stand, and Grow, Grow, Grow!

To Prevent Electrical Shock: Connect the eyelet of the enclosed ground cord to any bolt head. The other end should be connected to a ground point such as a water pipe or center screw of a grounded outlet. Please disconnect fixtures when watering plants.
